Application No.: 09/529,948

Filed: April 21, 2000

Liquid-Crystal display (Variants) and the method of the fabrication

The Yunder 37 C.F.R. § 1.111

Commissioner of Patents Washington, D.C. 20231

Dear Sir:

For:

In response to the Examiner's Non-Final Office Action dated September 17, 2002, the following amendments and remarks are respectfully submitted.

IN THE CLAIMS:

Please AMEND claims 1-31 as follows (marked up version of the claim changes is attached):

1. (Amended) A liquid crystal display with plurality of pixels, comprising:

two plane substrates with electric conductive layers deposited on sides of the substrates facing each other, the electric conductive layers covered with aligning layers and liquid crystal filling the space between the substrates; and

deflecting elements on at least one of the substrates, wherein the deflecting elements are dielectric and are over electric conductive layers along the perimeter of each pixel.
